

Central Intelligence Agency  
Office of the Deputy Director for Intelligence

14 October 1986

NOTE TO: Director of Central Intelligence

SUBJECT: DI Research Program for 1987

Here is the final version of the 1987 DI Research Program. We all appreciate the time and effort you devoted to commenting on it.

I am sending it to the NFIB members, a number of senior policymakers, Ambassador Armstrong, and the Oversight Committees. The DI office directors will also be using appropriate sections in their contacts downtown.

We are putting together some packages that you can send to NSC members that are tailored to their interests and show the magnitude of the program.

14 OCT 1986

NOTE TO: Executive Director

SUBJECT: DI Research Program for 1987

25X1

Attached is the DI Research Program for 1987. It contains sections on what we think the most important security and intelligence issues will be over the next five years, the issues we will be highlighting in our research this year, and DI office research plans.

Throughout the program, you will notice a strong emphasis on Soviet military plans and forces, Soviet economics and politics, and Soviet activities in the Third World. We have also focused on key functional issues--such as narcotics and terrorism--and on countries and areas with high potential for instability.

I urge you to leaf through the program, particularly those sections of special interest to you. I would value your comments on specific topics or the overall program.

Your NIOs have had a chance to comment on the program as it was being formulated. I know many of them provided some detailed comments on the program and suggestions about lines of research that they were interested in. I welcome any comments you may have on the program.
